SPCC Rules: Compliance Required by January 14th

We are finding that many of our clients are not aware that the above final rule from EPA is effective very shortly. Critical issues are:

- Do all of your **SPCC** regulated above ground storage tanks have secondary containment?
- At liquid loading and unloading areas, do you have a written response plan that describes how you can contain a spill if one develops during liquid transfer?

If the answer to either of these questions is no, we urge you to update your **SPCC plan** right away.

RT has Professional Engineers registered through the Mid Atlantic states and New England and we can update your **SPCC plan** promptly to meet the **January deadline**.

For information on the final SPCC EPA rule changes, [click here](#).

For many sites we can modify plans to include the new provisions and compliance schedule for a cost of a thousand dollars or less if your existing **SPCC Plan** was updated through 2002. If you would like a quote for updating your plan promptly, please contact:

Gary R. Brown, P.E.
RT Environmental Services, Inc.
gbrown@rtenv.com
610-265-1510 ext. 234

Larry Bily
RT Environmental Services, Inc.
lbily@rtenv.com
610-265-1510 Ext. 236

You can email your existing **SPCC Plan** to us and we will promptly provide a quote for an update.

Most facilities have integrated Contingency Plan and Stormwater Plans. In this case, we typically can complete annually required stormwater inspections at the same time we conduct **SPCC update** inspection for a small additional fee.

RT has prepared or updated more than 100 Contingency Plans in the last decade and we look forward to helping
