RT COMMENTS ON EPA PROPOSED COAL COMBUSTION RESIDUAL REGULATIONS

RT Environmental Services, Inc. (RT) recently provided comments to the United States Environmental Protection Agency on Coal Combustion Residual regulations proposed by the Agency. In an unusual type of rule making, the Agency proposed to the public to provide comments on regulating coal combustion residuals, most commonly comprised of coal ash, using a number of regulatory options.

RT recommended among other things, that existing sites be examined as appropriate, and that states should be given one year to indicate how coal combustion residual materials can be managed under their waste program.
