

## **Environmental Scientists, Geologists, and Project Managers Swedesboro, NJ**

RT is seeking Staff level personnel, Project Managers, and Senior Project Managers at all levels to add to our team in our Swedesboro, NJ office. RT is a growing firm, and opportunities for growth and advancement within the company are always available.

### **General Qualifications**

- Bachelor's degree or higher in geology, environmental science, or related scientific discipline and 2-15 years of technical experience in the environmental consulting/engineering industry.
- Must be detail-oriented, able to work in a fast-paced environment, communicate with clients and other staff, and prepare technical field notes and reports.
- Must demonstrate the ability to multi-task and possess prioritization skills.
- Attention to detail, quality of work, and the ability to take initiative and make technical decisions is a must. Excellent verbal and written communication skills are required.
- Initial 40 Hour OSHA HAZWOPER and/or 8 Hour Refresher is a plus.

### **Field Technicians/Staff Scientists/Geologists**

- Must demonstrate the ability to work outdoors and oversee subcontractors in all weather conditions.
- Must demonstrate the ability to conduct fieldwork including site inspections, soil and groundwater sampling, geophysical oversight, monitoring well installations, and other environmental remediation and monitoring fieldwork activities.
- Must demonstrate an ability to communicate with supervisors and project managers from the field and possess the ability to make informed decisions. Technical writing/grammar skills are a must.
- Prior experience with conducting Phase I and Phase II ESA's, as well as NJ Site Remediation Projects is a plus.

### **Project Managers and Senior Project Managers**

Candidates for the Project Manager position must have prior experience completing environmental fieldwork activities, preparing technical reports, and managing environmental projects. Environmental experience may include, but not be limited to, the following:

- Phase I Environmental Site Assessments
- Phase II Environmental Site Assessments
- Soil and Groundwater Investigations/Remediation
- Remedial Phase Reports (NJ Site Remediation Projects)
- Brownfields Redevelopment Projects
- RCRA Investigations
- NPDES Permitting
- Storage Tank (UST) Investigation and Closure Projects

- Prior experience and familiarity with the New Jersey Technical Requirements for Site Remediation.

- Prior experience with preparation of technical reports, such as survey reports, environmental assessments, workplans, investigation reports, permit applications, and other required written deliverables for submittal to clients and regulatory agencies (NJDEP).

- Prior experience with development of technical work scopes and proposals and ability to work on projects independently.

- Candidates for the Project Manager positions will possess prior experience in the areas identified above and be proficient in their writing and communication skills. Project Managers will be pro-active, professional, and demonstrate an ability to communicate with clients and co-workers. Experience level will differentiate Project Managers from Senior Project Managers. Typically, Senior Project Managers will possess more than 10 years of experience in managing environmental projects.

RT Environmental Consulting does not discriminate in employment on the basis of race, color, religion, sex (including pregnancy and gender identity), national origin, political affiliation, sexual orientation, marital status, disability, genetic information, age, membership in an employee organization, retaliation, parental status, military service, or other non-merit factor.
