**PA CHAMBER OF BUSINESS AND INDUSTRY SEEKS
MEMBER COMMENTS ON DEP PIPELINE REPORT**

The Pennsylvania Department of Environmental Protection issued a Report on the Governor's Pipeline Infrastructure Task Force which is to be finalized by February 2016. For those who are members of the PA Chamber of Business and Industry, which provides an important forum for environmental issues affecting Pennsylvania's industry, this is one of the largest recent opportunities for comment. There is a 48-member panel involved in preparing the Report which has representatives from government, industry and environmental groups from the public.

In its recent PA Chamber of Business and Industry Fall Environmental Seminars, the issues of pipeline expansion particularly from Southwest Pennsylvania to the Port of Philadelphia received much attention and comment. As late as three to four years ago, there was talk of closing one major refinery in Philadelphia, and now major investments will allow expansion of clean energy, including perhaps exporting from a previously closed refinery in Marcus Hook. Other Delaware and Schuylkill River waterfront sites are starting to receive attention, as lower cost energy is always key to improved industry and manufacturing business performance.

Gary Brown, P.E. President of RT Environmental Services, commented at one of the recent Fall Pennsylvania Chamber Environmental Seminars that the reinvestment in the Nation's energy infrastructure is long overdue, and coupled with cleaner fossil fuels that used in the past, could be a major plus for Pennsylvania for generations to come, with cleaner air being a major plus.

RT will be providing comments on the Report and if you wish to comment, we recommend that you contact Kevin Sunday at the Pennsylvania Chamber of Business and industry, who can be reached at: ksunday@pachamber.org
