

RT Environmental Services is Now Pennsylvania's Leading Brownfields Land Recycling Consultant!

In September 2004, the PA Department of Environmental Protection (PA DEP) released a list of Land Recycling Environmental Consultants. RT had the largest number of reports (32) already receiving Final Report approval in 2003/2004. No other consultant had even half of the number of RT's successful project completions during this reporting period.

Projects were completed in three of PA DEP's six regions; RT has completed projects in five of PA DEP's regions since the program started.

Successfully completed projects include:

- Port Carbon-Former Manufacturing Facility now Brewing Facility
- Martinsburg-Retirement Center Tank Release
- Manheim-Former Asbestos Products Manufacturing now Light Industrial/Warehouse Facility
- Reading-Former Incinerator now Residential
- Philadelphia-Former Dye Products Manufacturing Facility now Sewing
- Upper Dublin-Municipal Building Tank Release
- Phoenixville-Former Fly Ash Fill Area now New Park
- Gilbertsville-Former Service Station now Pharmacy
- King of Prussia-Former Water Treatment Products Manufacturing now Offices/Warehouse
- Lansdale-Shopping Center with Dry Cleaning Facility
- Norristown-Former Tire Manufacturing now Storage Facility
- Chester-Former Painting Facility now Marble Products Warehouse

Seven RT team members had project completions; our PA Land Recycling Team bench is deep!

RT appreciates the opportunities that our many clients are giving us to play a key part in remediating Pennsylvania's many Brownfields sites, and return so much of our land in Pennsylvania to productive reuse.
